

Chicago Longitudinal Study

****Version 2****

Age-32 Survey Questionnaire

In cooperation with the Chicago Public Schools, we are conducting a follow-up survey to better understand the role of school, family, and work experiences in adult life. Our project staff has been in touch with you from time to time about your educational, job, and family experiences. The project began when you attended kindergarten and is concerned with the effects of early childhood programs you attended. We are now continuing with the adult phase of the research project.

Information you provide will help schools, communities, and governments better serve the needs of children. It will also help to identify effective programs and policies to promote health and well-being. You will be paid \$50 for completing this survey. All information you provide will remain completely confidential. No one outside the project staff will see this information.
